Africa is the second-largest continent in the world both in size and population. As of 2009, about 14.7 percent of the world's population resides in Africa.

Africa is home to over 1 billion people who speak over 1,500 different languages. One in every four of the world's language are spoken only in Africa.

FACTS ABOUT AFRICA

FUN FACTS

For A Sharper Brain, A Smarter You!

Africa is the most centrally located continent in the world. Both the prime meridian (0 degrees longitude), and the equator (0 degrees latitude) cut across it.

The highest point in Africa is Mount Kilimanjaro in Tanzania. It rises 5895 meters (19,340 feet) above sea level.

Africa's largest country is Sudan. It has a total area of 967,940 square miles (2.5 million km²). The smallest country on the continent is The Seychelles, which is an island nation covering just 453 km² (175 miles²).

Africa's total size is roughly 11.7 square miles, representing about a fifth of the earth's total landmass. This makes it larger than India, China, Mexico, and USA's and a huge chunk of Europe combined.

More people speak French in Africa than do those in France.

Nigeria has the highest population (154.7 million people) in Africa. This represents 18% of Africa's total population.
